Excel format

```
(function() {  
  var myConnector = tableau.makeConnector();  
  myConnector.getColumnHeaders = function() {  
    var fieldNames = ['id', 'fruit', 'color'];  
    var fieldTypes = ['int', 'string', 'string'];  
    tableau.headersCallback(fieldNames, fieldTypes);  
  }  
  myConnector.getTableData = function(lastRecordToken) {  
    dataToReturn = [];  
    dataToReturn.push([1, 'Apples', 'red']);  
    dataToReturn.push([2, 'Oranges', 'orange']);  
    tableau.dataCallback(dataToReturn, lastRecordToken, false);  
  }  
  tableau.registerConnector(myConnector);  
})();
```

Json format: like excel or other format report standard  
(Visualization of google, Chart of ExtJs, ....)

**Format:**

Header: name, type

Table row: correspond data
