

To Health Information Systems administrators

Date: 11 September 2012

**DHIS2 Academy – Monrovia, November 19-23 2012**

We hereby invite to participate at the “DHIS2 Academy – DHIS2 Implementers Workshop” to be held in Monrovia, Liberia, November 19-23 2012.

The conference will be for people with working experience of setting up, maintaining and supporting DHIS2, with the aim of preparing national teams, and also West African regional team, of technical supporters and implementers.

The topics will cover all aspects of setting up and maintaining DHIS2, also covering good design principles, data quality, how to create customized reports, dashboard, and maps using the data in DHIS2, and setting up and maintaining a central national server implementation. Preferably two people from each country should attend. Practical work will take place based on new or existing national databases. The specific topics will be suitable both for new participants and those who have attended the Academy earlier.

We are currently working to secure a conference venue and group accommodation, and the costs and details will be communicated shortly. All costs, including conference fee, hotel and travel are expected to be covered by participants.

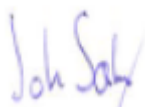

On behalf of the organizing committee,

Jørn Braa

Edem Kossi

Johan Saebo
