Also affects project (?) Also affects distribution Target to series

Edit

Bug Description

I have no wifi in our home and since wifi is not that accessible at sometime, I prefer to have USB Modem. This problem was already been resolved in Ubuntu 11.10. I do not know what or where exactly I can find the driver of my USB Modem, however, Ubuntu has it already BUT in order to use it, I have to perform this tutorial by Sir Alexfish at ubuntuforums in order to force load the driver. Please refer to this link http://ubuntuforums.org/showthread.php?t=1969322&page=2 the product and vendor is same as mine (1c9e:9605)
More Power to you E-Team. You are almost there...

Broadcom drivers aren't in pool Edit

Affects		Status	Importance	Assigned to	Milestone
	elementary OSEdit	New	Medium	Unassigned Edit	elementary OS luna-beta1

Also affects project (?) Also affects distribution Target to series

Edit

Bug Description

Luna 20120704
The Broadcom wireless drivers aren't available in the current apt-on-cd. These should be present so that they can be installed during the install process, allowing users to download updates during install as well, and so that users can have wireless out of the box.
(THIS BUG MAY ALREADY BE SOLVED, DOES IVO KNOW?)

Congrego hardcodes pool package list Edit

Also affects project (?) Also affects distribution Target to series

Edit

Bug Description

Right now Congrego hardcodes pool package list. It should read it from ship-live seed instead.

double repo entry Edit

This bug affects 3 people. Does this bug affect you?

Affects		Status	Importance	Assigned to	Milestone
	elementary OSEdit	Confirmed	High	Unassigned Edit	elementary OS luna-beta1

Also affects project (?) Also affects distribution Target to series

Edit

Bug Description

When I changed software sources' server from Indonesia to main server, double repos entries appear in "Other Software" tab, from Indonesia address and main server address. And I got this warning about sources list duplicate after reloaded packages info through synaptic.
I managed to manually remove double repos one by one and the warning disappeared after I reloaded packages info.

Files shortcut is missing from Plank Edit
