Journey Business Management

Registered 2010-12-21 by [Journey Drivers](#)

Journey is a Free & Open Source Business Management application offering integrated Customer Relations Management, Accounting, and Document Management.

Journey is developed with Ruby on Rails, but deployed on the enterprise-class Java platform using TorqueBox. The goal of Journey is to create an enterprise-class Business Management application that meets the needs of small to mid-size businesses.

This project group is comprised of several projects.
