

Still running Windows XP?
Microsoft's support for XP ends
soon: on the 8th of April 2014
That means, that you're exposed to
Viruses more than ever
If you don't want to throw away
your old computer, there is an
Alternative: Ubuntu

StartUbuntu, is a huge project and a massive campaign that is aiming to reach to Microsoft Windows XP Users and offering them a modern, unique, stable, fast, powerful, highly customizable, active, open-source, free Linux and amazing community based system which should replace their very old no longer supported Windows XP and breathe new life into their machines.
So come join our community, and be part of something great.
